

New journal announcement

Journal on Vehicle Routing Algorithms

Editors-in-Chief

Prof. Christian Prins, Université de Technologie de Troyes, France
Prof. Marc Sevaux, Université de Bretagne-Sud, Lorient, France

Editorial Board

D. Barbucha, Gdynia Maritime University, Poland
J.M. Belenguer, University of Valencia, Spain
K.F. Dörner, University of Vienna, Austria
G. Hasle, SINTEF ICT, Norway
S. Irnich, J. Gutenberg University, Germany
P. Lacomme, Blaise Pascal University, France
L. Muyltermans, University of Nottingham, UK
P. Penna, Federal University of Ouro Preto, Brazil
K. Sörensen, University of Antwerp, Belgium
C.D. Tarantilis, Athens University, Greece
D. Vigo, University of Bologna, Italy
P. Wagner, German Aerospace Centre, Germany
S. Wøhlk, University of Aarhus, Denmark

This is the first journal 100% devoted to vehicle routing covering:

- all kinds of vehicle routing problems (VRPs), in transportation but also in robotics
- manufacturing, satellite mission planning etc.
- traditional and advanced modelling techniques and solution approaches
- all applications of a domain of deep importance to modern society

Articles published in the journal will present models, algorithms, case studies and software, to attract the interest of academic and industrial researchers, practitioners, and policy makers.

Manuscript submission: Authors are invited to submit their manuscripts online via Editorial Manager at <https://www.editorialmanager.com/jvra/>.

Visit *Journal on Vehicle Routing Algorithms* online at www.springer.com/41604 for a variety of information, incl. instructions for authors, to register for free table of content alerts, and much more.
