

Please send a cover letter stating research aims and a CV to:
Dekan der Fakultät für
Wirtschaftswissenschaften der
RWTH Aachen, Prof. Dr.
Thomas Kittsteiner, 52056
Aachen.

You can also send your application via email to dekanat-fb8@rwth-aachen.de. Please note, however, that communication via unencrypted e-mail poses a threat to confidentiality as it is potentially vulnerable to unauthorized access by third parties.

The deadline for applications is September 30, 2015.

This position is also available as part-time employment per request.

RWTH Aachen University is certified as a family-friendly university and offers a dual career program for partner hiring. We particularly welcome and encourage applications from women, disabled people and ethnic minority groups, recognizing they are underrepresented across RWTH Aachen University. The principles of fair and open competition apply and appointments will be made on merit.

Full Professor (W3) in Deutsche Post Chair of Optimization of Distribution Networks Faculty of School of Business and Economics

We are seeking qualified applicants for teaching and research in the area of Optimization of Distribution Networks. The starting date is April 1, 2016. Applicants will have demonstrated their ability to conduct quantitatively oriented research on an international level through publications in highly ranked journals. In collaboration with industry partners, applicants will be expected to work on Operations Research models for solving real-world logistics problems. Experience in the acquisition of third-party funding is highly desirable, as are strong academic visibility and networking.

The successful applicant will be expected to collaborate closely with the other Chairs involved in the School's Research Area "Operations Research and Management (ORM)" as well as with Chairs from the University's engineering and natural science faculties. Ideally, the successful applicant will expand on existing competencies within the Research Area, e.g. by engaging in research into stochastic and/or robust optimization and/or multicriteria optimization. Teaching will be primarily directed towards the School's students of industrial engineering, business administration and economics, but may be potentially extended out to students of computer science and mathematics.

A Ph.D. degree is required; additionally, Habilitation (post-doctoral lecturing qualification), an exemplary record of research achievement as an assistant / an associate / a junior professor or university researcher and/or an outstanding career outside academia are highly desirable. Ability in and commitment to teaching are essential. The application should include supporting documents regarding success in teaching. German is not necessary to begin but will be expected as a teaching language within the first 5 years.

The position is temporary for 5 years with the possibility of conversion to continuing employment.
